LAB CHAIRS

LABMODUL LAB CHAIRS

- Intelligent Flex function
- Ergonomics and comfort features
- Hygienic
- 3D-Flex function
- Easy to clean
- Light weight

Good solutions are always characterized by intelligence and simplicity. The characteristics of innovation, in general, are no less relevant to the chair on which these innovations are based. The lab chair is the new chair for all kinds of laboratories. Its intelligent Flex function offers comfort and laboratory ergonomics with minimal adjustments required. It has all the properties required for laboratory work and, at the same time, it is light, universally applicable and unbeatable in terms of price and performance. To put it simply

The best adjustment is one you don't need to make.

Thanks to its innovative Flex functions, the lab chair is perfectly suited for laboratory work and therefore offers intuitively good seating.

Hygienic, flexible, compact – in no other working environment will you find requirements as strict as those in the laboratory. Laboratory chairs from Labmodul not only adapt to the postures typically found in this area, i.e. the forward-leaning position at the microscope, they also boast hygienic design and compact construction.

They can also be flexibly adjusted without confusion. These are seating solutions that thus adapt perfectly to the special challenges faced by laboratory workers.

How do you sit in the world's most innovative location? The demands on laboratory facilities are constantly increasing: hygiene issues, space requirements, ergonomics, comfort, design and technical qualities are all challenges which a laboratory chair has to overcome in the modern working environment. Our chair can do all this with its supreme light-weight design.

How do you sit in the world's most innovative location? The demands on laboratory facilities are constantly increasing: hygiene issues, space requirements, ergonomics, comfort, design and technical qualities are all challenges which a laboratory chair has to overcome in the modern working environment. This lab stool can do all this with its supreme light-weight design.

3D-FLEX FUNCTION OF THE BACKREST

The Lab stool backrest has a 3D-Flex function. It adapts to the movements of the user and therefore follows the upper body when leaning back or turning sideways. This ensures a dynamic seating position and provides optimal support for the body in any position.

INTUITIVE HANDLING

This lab stool automatically adapts to the body with its Flex function. There is no need for complicated adjustment levers. Only the height of the seat needs to be adjusted. This makes the stool a self-explanatory chair and ensures that its ergonomic functions are properly used.

FLEX FUNCTION ON THE FRONT EDGE OF THE SEAT

The front edge of the seat automatically follows the forward-angled working position of the body, which is typical for laboratory work. This ensures optimal blood circulation and effectively prevents pressure pain and dead legs. It therefore provides exceptional comfort and optimal ergonomics.

SEATING COMFORT

The lab stool wins you over from the very first impression. In addition to the Flex function, an extra thick upholstery provides the comfort of deep seating. It brings seating comfort to the laboratory.

Colors: Blue, anthracite, white, orange and green.

This lab stool is on hand wherever you need it. It is the uncomplicated solution for short periods of sitting. However the labmodul lab stool is in no way inferior to the swivel chair when it comes to laboratory suitability. It is washable, resistant to disinfectants and robust. The PU-foam upholstery is very comfortable.

SIMPLE, ECONOMIC, VERSATILE

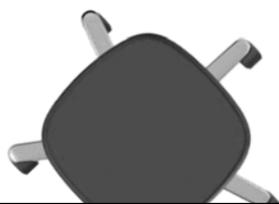

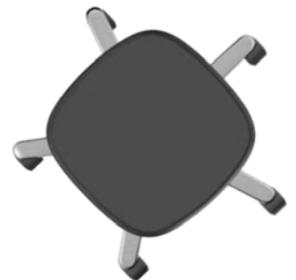

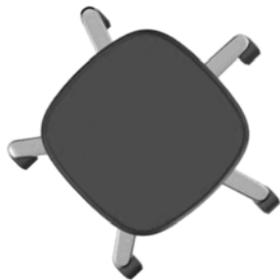

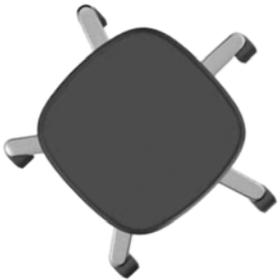

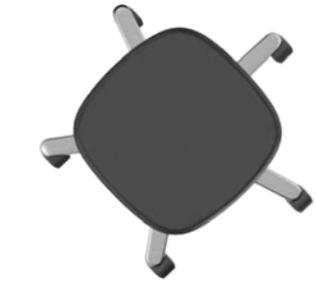

Working in a laboratory is not always about concentrating for long periods of time. Often it may involve simply preparing a sample or loading a machine. The lab stool plays a key role in comfortable working in these situations.

ORGANIC FORM

The surface of the seat is designed to offer maximum space. The user can sit on the stool in any direction.

RELEASE

The Labsit lab stool is infinitely height-adjustable. It can be easily operated using the rotating release ring.

- Space-saving
- Self-explanatory and simple
- Flexible use
- Ideal for short periods of sitting
- Easy to store

Perfect for every workplace

A perfect system is characterised by the fact that it has the right solution for every requirement. This is because the LCB9011 series has been conceived as a seating system. Apart from LCB9012 and LCB9013, the stool and standing aid guarantee that you receive optimum support at every workplace.

Everything fits with this system: for example, the round base of the stool into the star base of the chair. So that two specialists share the space of one.

LCB9011 series puts an end to compromises between sitting and standing in the laboratory and offers the right solution for every single working situation.

Color: Black, blue, grey, red, mint and white.

Perfect balance with optimum ease of operation.

The essence of healthy sitting is dynamic sitting. With the uniquely adjustable Balance mechanism the saddle moves subtly along with your movements. These 'micro' movements of your pelvis ensure that muscle groups and intervertebral discs are not constantly under severe static strain. This prevents pain, helps you maintain your working posture longer, and exercises your core muscles. The degree of movement of the Balance mechanism can be set to your own preference, and can be adjusted by rotating the ring.

The LCS5001 series Seamless saddle stool has anatomically shaped saddle that tilts the pelvis and ensures a healthy and relaxed back posture. The advantage of the seamless version is that dirt can't accumulate in the seams.

The seat can be upholstered in Stamskin or PUxx, both of which have antibacterial properties. A unique characteristic of PUxx is that it can be cleaned with Isopropyl alcohol and that offers a solution when it comes to workplaces such as the medical field where high demands are placed on hygiene. The Jumper is a wider version of the Amazone and is available in different heights.

Colors: Bright green, bright red, orange, turquoise, light blue, dark blue, antracite, gray, black, green/anthracite and mix color combinatios.

Steady stool for frequent sitting and standing.

The LCS5011 series provide the solution for work that requires frequent changes between sitting and standing. They are also ideal for workplaces where there is a lack of leg space.

In order to work comfortably and without strain, your sit stand stool should be adjusted to the desired working height. Thus, you find the beautifully designed "Steady" in many museums, including the famous "National Museum" in Amsterdam. With the adjustable seat and the handy footrest (foldable), the "Steady" can be used for support in a standing position as well as being a comfortable seat.

Color: Black

So much more than something that catches the eye in the office.

The LCI1011 series stool is the archetypal form of all seating, the first introduction to the world of seating. It stylishly unites opposites, it stands for both tranquillity and action, for concentration and movement. You feel freer when you sit on a stool; always ready to jump up with the next new idea. This makes the other contrasting expectations all the greater.

It must be flexible enough to enable people to have spontaneous conversations while at the same time providing great practical features and design. So the LCI1011 series – bridge element in three different sizes adapts perfectly to any room situation, and thanks to the full range of electrification options, creates the ideal basis for discussion at any time.

In terms of design, LCI1011 series effortlessly adapts itself to any space. All the wooden elements are available in black, white, oak or American walnut. All this means that bar stools and bridge element are furniture that can be used anywhere at all, as if specially created for every office where there is a distinctive culture of dialogue.

High-quality materials characterise the charismatic appearance of the LCI1011 series. It plays with colour and touch and feel. The metal parts are available in black, brilliant silver, white or in tangibly classy blasted aluminium versions.

Color/metal parts: black, brilliant silver, white, blasted and anodised silver.

Sitting without compromise.

The LCI1001 series puts an end to difficult decisions. LCI1001 does not compromise at all, in terms of the clear and simple design, the easy-to-use functions, the reliability, or the ergonomics and comfort. LCI1001 is inviting and comfortable.

The LCI1001 office swivel chair is perfectly ergonomically equipped. Its soft upholstery and generous feeling of spaciousness make it wonderfully comfortable.

LCI1001 has many features that make working more pleasant. It adjusts perfectly to the body in every aspect and its high-performance synchronous mechanism and high quality finish, together with the integrated headrest, provide an especially comfortable experience. LCI1001 represents uncompromising seating performance, which ensures the best possible efficiency at work.

Colors: Black, red, yellow, dusty grey, Pastel blue, green, nut brown and ultramarine blue.

Solid stool with multi-purpose function.

The LCS5021 is a solid stool with a round gas lift just below the seat. The seat can be furnished with Beech, PU (polyurethane) or Stamskin. All are easy to clean. Additionally, polyurethane is resistant to various chemical substances and Stamskin has antibacterial properties and is also resistant to urine, blood, sweat and mildew and is water repellent.

To support your feet, the LCS5021 features a footring that is adjustable in height. Equipped with an aluminium base that is 70 cm in diameter.

- Height adjustment 58-83 cm
- Work surface Height 90-100 cm
- Adjustable footring ø 54 cm

Chairs for comfortable laboratories

Whether in the pharmaceuticals, biotech, chemistry, health care, clean-room or medical technology field, Labmodul chairs is always the perfect seating solution with its hygienic design. The clever combination of material, form and processing provides all the properties needed for use in the lab.

Good seating is an investment in the future. The quality of the workplace is one of the key factors in employee motivation. Labmodul chairs makes a core contribution to this in terms of comfort and exceptional design and therefore helps to achieve successful working.

Sitting on Labmodul chairs is very enjoyable. The combination of optimal laboratory suitability and intuitive handling makes this chair a real all-rounder. It impresses in hospitals, universities, technical research facilities, health care areas and training rooms.

The exceptional price-performance ratio ensures that every kind of laboratory can now have chairs with optimal characteristics. This also makes Labmodul chairs the ideal solution when it comes to furnishing larger properties.

Labmodul chairs

ANTI-BACTERIAL

Artificial leather upholstered covering with significant anti-germ effects (Sanitized)

SUITABLE FOR CLEANROOMS

For use in cleanrooms category 3 in accordance with ISO 14644-1

FREE FROM POLLUTANTS No toxins or emissions

GMP-CONFORM

Meets the specifications of the GMP regulations

MINIMAL JOINTS

Hygienic design for easy cleaning and disinfection

RESISTANT TO DISINFECTANTS AND CHEMICALS Resistant to all of the usual disinfectants and chemicals in accordance with ISO 2812 Resistant to all of the usual disinfectants and chemicals in accordance with ISO 2812

SUITABLE FOR USE IN BIOTECHNOLOGY LABORATORIES

Adheres to biosafety level BSL1, BSL2, BSL3 of the Directive for Biological Agents

GS-CERTIFIED

For the highest levels of safety

MEDICAL

Arbejdsstole til laboratorier og klinikker

Arbejdsstolen Medical er afvaskelig og hurtig at indstille.

Gasliften fåes i flere højdeintervaller, så stolen kan bestilles til arbejde ved lave eller høje borde.

Ved valg af sæde med skråt afskårne hjørner kan stolen også bruges som ståstøttestol.

Ryglænen kan vælges i høj eller lav udgave – den lave kan også drejes, så stolen giver armstøtte.

■ ■ ■ Saddle chairs

labmodul

Experience the comfort of a Score saddle chair. The ergonomically shaped saddle seat ensures a healthy back posture, whilst the feet are planted firmly on the floor. The shape of the saddle promotes the natural S curve of the spinal column and thus a less tiring posture. The saddle chair makes it possible to easily move sideways and around your workplace. The Score saddle chair comes in two different forms. The "Jumper" has a wider seat and the "Amazone" a narrower seat. It is also possible to provide the Jumper, Amazone and Jolly with a "Balance" mechanism as accessory. This sophisticated mechanism moves the seat in the direction of the centre of gravity of the user's upper body when changing posture. The pelvis and the spinal column stay in balance, and pressure points such as the inside of the thighs and the pubic bone are relieved of pressure. The already comfortable saddle seat is thus even better. The seamless upholstered saddle seats are designed for workplaces where hygiene is very important.
